

3 STEPS TO CONSISTENCY

meet with Alterion[®],

Adisseo probiotic solution for poultry production

1 One Unique Strain

To develop Alterion[®], Adisseo and Novozymes applied a careful selection process. Take into account safety, efficiency and gut health criteria, we came up with a specific strain of *Bacillus subtilis* with a unique genome and therefore unique properties.

Alterion[®] properties and effects are visible on both performance and gut health. It indeed acts in providing a consistent improvement of growth indicators (-2,5% FCR) in standard as well as in digestive challenge conditions.

Two Distinct Actions

GUT HEALTH

FCR ↓
BWG ↑

PERFORMANCE

3 Three Area of Impact

Once in the gut, Alterion[®] activates and works at three different levels to provide the most efficient and consistent results seen at the animal Level.

MICROBIOTA & PATHOGENS

INTESTINAL WALL

IMMUNE SYSTEM
